IN THE SPECIFICATION

Please amend the paragraph at page 66, lines 22-24, as follows:

As for the mixing machine, there is, for example, a V-type mixer, a Rocking mixer ROCKING MIXER, a Loedige mixer LOEDIGE MIXER, a Nauta mixer NAUTA MIXER, and a Henschel mixer HENSCHEL MIXER.

Please amend the paragraph at page 106, lines 9-27, as follows:

The foregoing materials was mixed with a Hensehel mixer HENSCHEL MIXER, to thereby obtain a mixture where water is impregnated in a pigment aggregate. Subsequently, the mixture was kneaded with twin rollers with a surface temperature of 100°C for 45 minutes, then, rolling and cooling are performed, and then, milling is performed with a pulverizer. Thereby, a masterbatch pigment was obtained.

• polyol resin 1

95 parts

· above-described masterbatch

10 parts

· charge control agent (Bontron E-84 manufactured by

Orient Chemical Industries)

2 parts

• wax (fatty acid ester wax, melting point 83°C, viscosity 280mPa • s (90°C)) 5 parts

Please amend the paragraph at page 108, line 15, to page 109, line 2as follows:

The foregoing materials was mixed with a Henschel mixer HENSCHEL MIXER, to thereby obtain a mixture where water is impregnated in a pigment aggregate. Subsequently, the mixture was kneaded with twin rollers with a surface temperature of 130°C for 45

Application No. 10/615,770 Reply to Office Action of May 20, 2005

minutes, then, rolling and cooling are performed, and then, milling is performed with a pulverizer. Thereby, a masterbatch pigment was obtained.

polyol resin 1

2 parts

• wax (fatty acid ester wax, melting point 83°C, viscosity 280mPa • s (90°C)) 5 parts

Please amend the paragraph at page 112, lines 3-7, as follows:

By adding the aforementioned inorganic fine particles 1 to 4 of 3.0 wt % to a toner (developer), mixing with a Henschel mixer HENSCHEL MIXER, filtering with a mesh size of 50μ m, and removing aggregate material, toner for each color was obtained.
